

## Aluminum Continuous Geared Hinges

**Q: What are STANLEY continuous geared hinges?**

A: A continuous geared hinge is a single hinge that goes the full length of the door. Our continuous geared hinge design is as tough and practical as it is attractive. Made of 6063-T6 aluminum, it is designed for high traffic applications and built to last for the life of the building.

**Q: What hinge types are continuous geared hinges offered in?**

A: Continuous geared hinges are available in full mortise, half mortise, half surface and full surface.

**Q: What hinge tips are offered for continuous geared hinges?**

A: Continuous geared hinges can be ordered with:

- Hospital Tip Cut: Available on models 661HD and 662HD. This option provides a sloped tip on top of the barrel.
- Hospital Tip Cap: Hospital tips designed for each specific hinge application available for models 661HD, 662HD, 664HD and 665HD. 663HD comes with an in-box safety wedge for installation at the job site. These custom fit caps are ligature resistant and are aesthetically appealing.

**Q: What hinge options are available for continuous geared hinges?**

A: Many made-to-order hinge options are available including: concealed electric, concealed switch, electric power transfer, dutch door prep and school option.

**Q: What lengths are continuous geared hinges available to order in?**

A: Continuous geared hinges come in five standard lengths: 79", 83", 85", 95" and 119". In addition, they can be cut to any particular length upon request.

**Q: What screws are included with continuous geared hinge orders?**

A: TEK screws are included in continuous geared hinge orders. Wood and machine screws are available to order separately.

**Q: Do you have to specify handing when ordering continuous geared hinges?**

A: The handing varies based upon application.

**Q: What finishes are offered for continuous geared hinges?**

A: Continuous geared hinges are available in aluminum, black, and dark bronze finishes.

**Q: What is the lead time for continuous geared hinges?**

A: The average lead time for stock continuous geared hinges is 2 to 5 days from order receipt. Please consult the factory for lead times on made-to-order requests.

**Q: What electrical options are available for continuous geared hinges?**

A: Many geared continuous hinges can be electrified, and options include the:

- CE-12EA (Easy Access) Hinge is supplied as one length with an access panel built into hinge to allow for access to through wires.
- CE-12R (Removable) Hinge is supplied in three sections so the electrical section can be removed.
- Concealed Switch can be supplied with either through wire option.

**Q: What warranty do continuous geared hinges have?**

A: Continuous geared hinges have a limited lifetime mechanical warranty for the life of the building and a 5-year electrical warranty.
